Department of Electronics and Communication Engineering Entrepreneurship Development Cell -Webinar

The Entrepreneurship Development Cell of ECE in association with Institution's Innovation Council, Ministry of HRD Initiative, and Government of India organized a webinar on 31.01.2022 through Google meet from 2.00 PM -3.00 PM. The theme of webinar was "Pitching Events for Ideas Scouted and Linkage with Innovation Ambassadors for Mentorship Support". The purpose of this workshop is to develop the students about innovative design and desirable products. The interactive session was presided by the Chief Guest is Dr. Prem Ananth , IC Convener, IIC Innovation Ambassador for "Design Thinking & Innovations", Assistant Professor (ECE), Francis Xavier Engineering College who spoke about classifications of design thinking and innovations . The entire session went on well through the interaction between student innovators and the chief guest. The program was co-ordinated by Mr.Ashok Kumar,AP/ECE.

Department of Civil Engineering
Entrepreneurship Development Cell –Webinar

The Department of Civil Engineering organized a program on the topic "Inspiring Talk by Successful Entrepreneur" under Entrepreneurship Development cell on 31-01-2022 through Google meet platform from 11.30 AM -12.30 PM. The purpose of this program is to create awareness among faculty and students of Engineering courses about various facts of entrepreneurship as an alternative career option as also to highlight the merits of pursuing such an option.

Moreover, this webinar also aims to bring together the experts from industries, government agencies working in the field of entrepreneurship and students of Engineering in order to provide a forum for the free and fruitful exchange of ideas and information for becoming an entrepreneur. The guest speakers for the session were Mr. Mohamed Riaz, Executive Director, BNI Tirunelveli, Tirunelveli, Tamil Nadu, and India. The program was co-ordinated by Mr.M.Ratheesh, SM-EDC/Civil.

Applied Lab

Product Development Lab

On behalf of Product Development Lab Our students create a 3D Display Model by 4X4X4 LED Cube.A LED cube is like a LED screen , but it is special as it has 3D.We can think it as of low resolution displays.In normal displays it is normal to stack pixels closer to each other in order for better resolution but LEDcube has its limits. The LED cube has 64 LEDs. So it is impractical to dedicate a IO port for eachLED. Instead LED cube rely on optical phenomenon called Persistence of vision.If you flash a LED reallyfast it will remain in your retina for some time even after LED is switched off. By flashing each layer ofcube very fast after one another it gives the feeling of 3D View. This project is guided by Mr.A.FerminusRaj,HOD/EEE.

To
All Hub Coordinators
IEDP Hubs

Sir/Madam,

Sub: Promotional Activities on Entrepreneurship in Spoke Colleges-Approval-Requesting Action Plan Reg.

Ref: 1. Action Plan IEDP 2021-22.
2. This office letter No: PMO/83/2021-PMO-EDII, Dated: 06.10.2021.
3. This office letter No: PMO/83/2021-PMO-EDII, Dated: 02.11.2021.

Innovation and Entrepreneurship Development Programme (IEDP) is the flagship programme of EDII to create entrepreneurship orientation among college students and EDII-TN has taken many initiatives under IEDP in a hub and spoke model, to promote entrepreneurial culture in Higher Educational Institutions in the State.

As per the IEDP Action Plan 2021-22, it is proposed to organise 200 Promotional activities on Entrepreneurship in Spoke colleges with the budget support of Rs. 20 lakh.

As per the reference 2nd cited above the above activity may be conducted in 200 best performing Spoke institutions by providing Rs. 10,000/- per institution for organising various entrepreneurship promotional activities in the institution for their students.

In this regard the details had been collected from the spoke colleges through respective Hubs towards conducting awareness programme by the spoke colleges. The actions are as below, Participation of students minimum 750 students or 50 % of the total students of the institution, whichever is more, in the awareness programme to be organised under IEDP project' only not others. The performance will be given for selection of IEDP Hubs.

Now 127 proposals were received from spoke colleges through respective Hubs, out of 127 proposals, 81 proposals were selected based on the norms prescribed.

In this connection we may request to submit the details of programme to be conducted spoke colleges through respective Hubs, as per the enclosed format for implementing of IEDP activities.

More over the following 8 programmes, they may request to conduct at least 5 programmes.

1. Business Plan Preparation workshop – Minimum 40 students from the institution
2. Design Thinking Workshop - Minimum 40 students from same institution
3. EDII Entrepreneurship Course – (at least 25 Students should have obtained certificate)
4. Start-up/Entrepreneur showcase in their institution – with a minimum of 20 student startups and entrepreneurs (either present students or Alumni)
5. Workshop on IPR - Minimum 40 students/Faculty from the institution
6. workshop in the Institution Innovation Council
7. Starting Campus Company in the institution.
8. Any other programme designed by the institution to promote entrepreneurship (one programme only).

Department of Mechanical Engineering

ALUMNI INTERACTION

Er.S.Mariappan, Alumni of the department of Mechanical Engineering, 2005-2009 of our college has given a lecture in "Waste Management and Farm Management" to our first year undergraduate students on 14.02.22 between 11am to 12.30 pm. He addressed the students with flourishing ideas about the waste management and farm management and also be focused more on the construction of traditional houses using natural materials. His valuable thoughts and motivation for students is highly appreciated.34 of our I year Civil and Mechanical Department students participated in this session.This Event was coordinated by Mr.M.Balasubramanian,AP/Mech and Mr.M.SenthilKumar,AP/Mech.

Department of Management Studies

The Department of Management Studies coordinated a preparation program on 16/02/2022, the subject "Brief Introduction to Aptitude" with the target to upgrade critical thinking abilities, work on fundamental numerical abilities and to help understudies who are getting ready for a serious assessments. The asset individual for the offline course was Mr.S.Rajkumar Immanuel, Trainer from Tirunelveli. The program began with an introduction conveyed by Dr M.Shunmugasundaram, Professor and Head, Department of Management Studies and followed by a welcome note by Mr.Pradeep De Joe, Assistant Professor, MBA. In light of the reason that everybody is after fruitful culmination of this preparation, understudies will have the information and abilities to

a) Solve the issues effectively by utilizing Short-cut technique with time usage which will be useful to them to clear the serious tests for better open position,

b) Analyze the Problems intelligently and approach the issues in an alternate way. The meeting finished with a series of conversation and statement of gratitude by Mr.Samuel Sathyanathan, Assistant Professor,MBA. The preparation program was attended by around 40 members.

Resume Building Interview

On 18 February 2022 an Interview on Resume Building was conducted for the first-year students, by various faculties of all the departments. The students were interviewed in 10 panels around 181 of our first-year students were interviewed by the panel members along with the presence of student mentors where the mentors were able to observe the performance of their mentees. This interview on resume building has been a wonderful opportunity for the practicum students to practice their interview and resume writing skills as they prepare to graduate. As the questions were regarding foundational skills, SAS scores, career aspiration, curricular and co-curricular activities, it was an overall an eye opening and beneficial session for the students the panel members and the mentors were able to diagnose the problems of the students. The students participated enthusiastically with resume and proper dress code. Besides the students were also insisted to create a LINKED IN profile. This session was very well planned and meticulously executed by Mrs. Jaysri Lakshmi the Mentor Coordinator with relevant resume building question source by the DR. Allwyn Kingsley , professor placement.

Internet of Things Based Smart Accident Recognition and Rescue System Using Deep Forests ML Algorithm

Abstract

Road accidents are very common nowadays. As more people are buying vehicles, the frequency of road accident increases. There are gargantuan amount of sensor available in the vehicles to monitor the condition of both the vehicle and the people traveling in it. To trim down the fatality rate, nowadays automobiles are manufactured with various safety measures (like air bag system) to prevent the people from accident. But it is extremely intricate to deal with injured people who are involved in the accident. The process of informing the hospital to attend the injured people, informing the police station to indicate the accident zone and claiming the insurance for the vehicle becomes a difficult task. The proposed Deep Forests algorithm is the Machine Learning Algorithm which recognizes the accident in most accurate way with enhanced hyper parameters. In order to speedup this process, a smart accident recognition and rescue system is introduced which performs these tasks in an easy way.

Banana cultivation is one of the main agricultural elements in India, while the common problem of cultivation is that the crop has been influenced by several diseases, while the pest indications have been needed for discovering the infections initially for avoiding the financial loss to the farmers. This problem will affect the entire banana productivity and directly affects the economy of the country. A hybrid convolution neural network (CNN) enabled banana disease detection, and the classification is proposed to overcome these issues guide the farmers through enabling fertilizers that have to be utilized for avoiding the disease in the initial stages, and the proposed technique shows 99% of accuracy that is compared with the related deep learning techniques.
